INSTRUCTIONS (ANDROID)

android

Adding your medical information, emergency contacts, SOS settings, and alerts on an Android phone can save precious minutes during a crisis. Follow these instructions to add important medical information on your Android device for easy access when you need it most.

Medical Information

By adding medical information, you can display key health details (allergies, medications, blood type, conditions) on your screen for first responders, even if your phone is locked. This can help emergency medical teams and hospital staff make safe, informed decisions faster.

- ☐ Open the Settings app.
- ☐ Tap Safety & Emergency (sometimes under Personal Safety or Advanced Settings).
- ☐ Tap Medical Information → Add details like blood type, allergies, conditions, medications, and emergency notes.
- ☐ Make sure Show on Lock Screen is enabled.

Emergency Contacts

Adding emergency contacts allows others to call your designated contacts without unlocking your phone, ensuring loved ones are notified quickly.

- ☐ Open the Settings app.
- ☐ Tap Safety & Emergency (sometimes under Personal Safety or Advanced Settings).
- ☐ Tap Emergency Contacts → Add from your contact list. Make sure Show on Lock Screen is enabled.

Emergency SOS

Setting up Emergency SOS automatically calls 911 (or local emergency services) and shares your location with your chosen contacts after pressing the power button 5 times.

- ☐ Open the Settings app.
- ☐ Tap Safety & Emergency (sometimes under Personal
- ☐ Safety or Advanced Settings).
- ☐ Tap Emergency SOS and Turn it “On”
- ☐ Choose what happens when activated:
  - ☐ Call emergency services
  - ☐ Share location
  - ☐ Record video
  - ☐ Alert emergency contacts

Turn on Emergency Alerts

Enable Wireless Emergency Alerts (WEA) to receive severe weather alerts, AMBER alerts, and local safety threats.

- ☐ Go to Settings → Notifications → Wireless Emergency Alerts.
- ☐ Turn on the types of alerts you want (e.g., Extreme threats, AMBER alerts, Test alerts).

Emergency Location Sharing

By enabling this, you can send your real-time location to trusted contacts so they can find you or send help.

- ☐ Open Google Maps.
- ☐ Tap your profile photo → Location Sharing → Share with contacts.
- ☐ Choose who can see your real-time location and for how long.
