PROTECTION FROM WILDFIRE SMOKE

Seek Shelter Indoors

Stock up on medications and other essentials at home and work. Stay indoors. Limit travel.

Clean inside air

Air purifiers and sealed windows can protect the air indoors. Close air vents inside your home or building.

Limit Indoor Pollutants

Limit the use of ovens, vacuums, or other risks to indoor air during wildfires.

Protect Your Pets

Limit outdoor exposures for your pets and clean off ash or debris.

Wear a Mask

If you need to leave the house, wear an N95 mask.

Seek Medical Attention

Watch for symptoms including coughing, wheezing, burning in chest and shortness of breath.

Take Extra Care

Pay special attention if you have asthma, heart or lung disease, children or infants, are over 65, or are pregnant.
